

Submission Worksheet

Submission Data

Course: IT202-450-M2025

Assignment: IT202 - Milestone 3

Student: Nicholas P. (nmp33)

Status: Submitted | **Worksheet Progress:** 100%

Potential Grade: 10.00/10.00 (100.00%)

Received Grade: 0.00/10.00 (0.00%)

Started: 8/5/2025 12:29:15 PM

Updated: 8/5/2025 1:04:52 PM

Grading Link: <https://learn.ethereallab.app/assignment/v3/IT202-450-M2025/it202-milestone-3/grading/nmp33>

View Link: <https://learn.ethereallab.app/assignment/v3/IT202-450-M2025/it202-milestone-3/view/nmp33>

Instructions

1. Refer to Milestone3 of this doc:
<https://docs.google.com/document/d/1XE96a8DQ52Vp49XACBDTNCq0xYDt3kF29cO88FWVwfo/view>
2. Ensure you read all instructions and objectives before starting.
3. Ensure you've gone through each lesson related to this Milestone
4. Switch to the Milestone3 branch
 1. `git checkout Milestone3` (ensure proper starting branch)
 2. `git pull origin Milestone3` (ensure history is up to date)
5. Fill out the below worksheet
 - Ensure there's a comment with your UCID, date, and brief summary of the snippet in each screenshot
 - Ensure proper styling is applied to each page
 - Ensure there are no visible technical errors; only user-friendly messages are allowed
6. Once finished, click "Submit and Export"
7. Locally add the generated PDF to a folder of your choosing inside your repository folder and move it to Github
 1. `git add .`
 2. `git commit -m "adding PDF"`
 3. `git push origin Milestone3`
 4. On Github merge the pull request from Milestone3 to dev
 5. On Github create a pull request from dev to prod and immediately merge. (This will trigger the prod deploy to make the heroku prod links work)
8. Upload the same PDF to Canvas
9. Sync Local
10. `git checkout dev`
11. `git pull origin dev`

Section #1: (3 pts.) Api Data

Progress: 100%

⇒ Task #1 (1 pt.) - Concept of Data Association

Progress: 100%

Details:

- What's the concept of your data association to users? (examples: favorites, wish list, purchases, assignment, etc)
- Describe with a few sentences

Your Response:

I added a feature where users can favorite trails. This can be done by themselves and then edited by admins or removed by themselves as well.

Saved: 8/5/2025 12:29:40 PM

⇒ Task #2 (1 pt.) - Data Updates

Progress: 100%

Details:

- When an associated entity is updated (manually or API) how is the association affected?
 - Does the user see the old version of the data?
 - Does the user see the new version of the data?
 - Does the user need to have data re-associated or remapped?
- Explain why.

Your Response:

When an association updates users will see the new one as it will override the old entity. It is associated by trail id, so an edit or overwrite will have the same id with new data.

Saved: 8/5/2025 12:30:38 PM

≡ Task #3 (1 pt.) - Handling Association

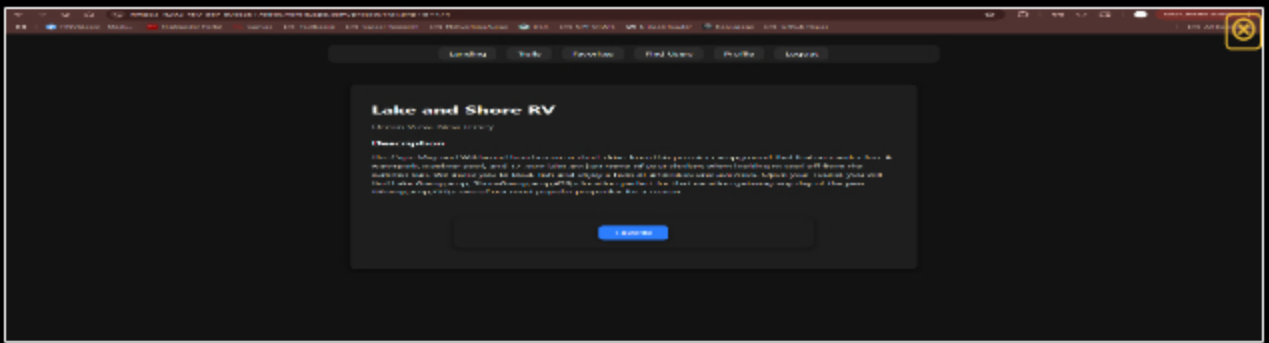

Progress: 100%

Part 1:

Progress: 100%

Details:

- Show an example page of where a user can get data associated with them
- Ensure heroku dev url is visible
- Caption if this is a user-facing page or admin page

user facing

 Saved: 8/5/2025 12:40:20 PM

≡ Part 2:

Progress: 100%

Details:

- Describe the process of associating data with the user.
- Can it be toggled, or is it applied once?

Your Response:

It can be toggled, the user can either favorite or unfavorite from this page. User can also unfavorite from their favorites page via the unfavorite button, or the unfavorite all button. Admin can also clear associations with a specific trail as well.

 Saved: 8/5/2025 12:40:20 PM

Section #2: (6 pts.) Associations

Progress: 100%

≡ Task #1 (1.50 pts.) - Logged-in User's Associated Entities

Progress: 100%

Details:

- Each line item should have a logical summary
- Each line item should have a link/button to a single view page of the entity
- Each line item should have a link/button to a delete action of the relationship (doesn't delete the entity or user, just the relationship)
- The page should have a link/button to remove all associations for the particular user
- The page should have a section for stats (number of results and total number possible based on the query filters)
- The page should have logical options for filtering/sorting
 - A limit should be applied between 1 and 100 and controlled by the user (server-side enforces rules)

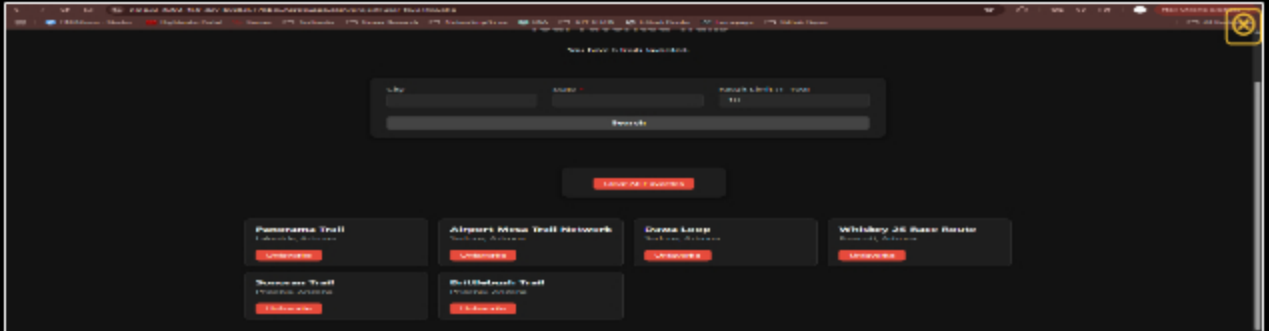

- A filter with no results should show "no results available" or equivalent

Part 1:

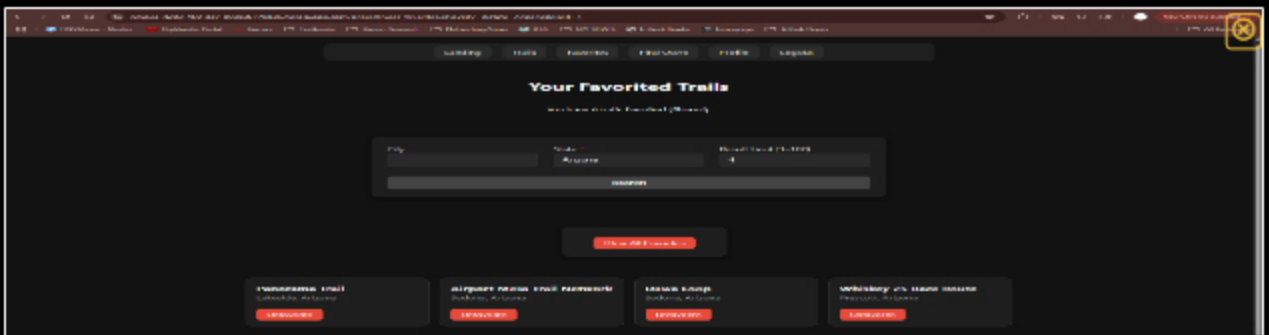

Progress: 100%

Details:

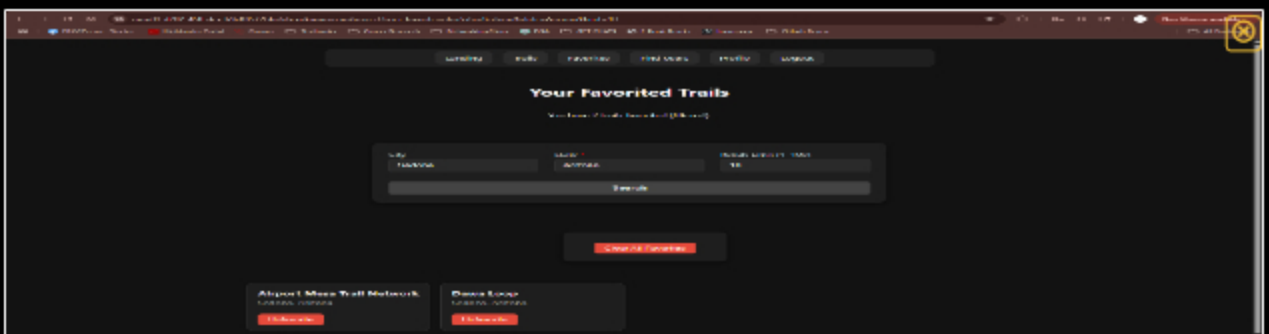

- Show a few examples of this page from heroku dev with various filters applied
- Ensure heroku dev url is visible
- Ensure each requirement is visible

Favorites Default

State/Limit Set

City/State Set

Saved: 8/5/2025 12:50:40 PM

Part 2:

Progress: 100%

Details:

- Describe how you solved showing the particular association output
- Describe how you solved the various items required for this page (i.e., line item requirements, stats, filter/sort, etc)

Your Response:

I used a get form for filtering parameters. I have a table that stores all user entity associations so I query the table based on the user id and then find all trails they have favorited. It then just filters by the city, state, and limit on those favorited results.

Saved: 8/5/2025 12:50:40 PM

≡ Task #2 (1.50 pts.) - All Users Association Page

Progress: 100%

Details:

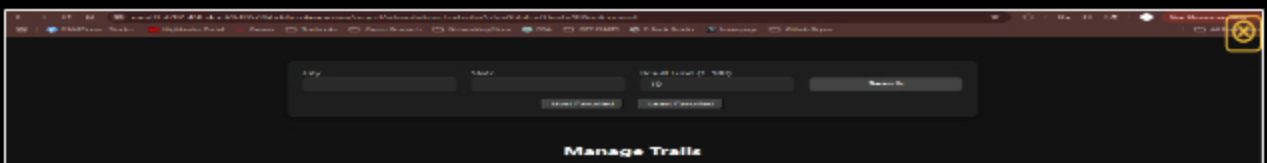

- Each line item should have a logical summary
- Each line item should include the username this entity is associated with
 - Clicking the username should redirect to that user's public profile
- Each line item should include a column that shows the total number of users the entity is associated with
- Each line item should have a link/button to a single view page of the entity
- Each line item should have a link/button to a delete action of the relationship (doesn't delete the entity or user, just the relationship)
- The page should have a section for stats (number of results and total number possible based on the query filters)
- The page should have logical options for filtering/sorting
 - A limit should be applied between 1 and 100 and controlled by the user (server-side enforces rules)
 - A filter with no matching records should show "no results available" or equivalent

Part 1:

Progress: 100%

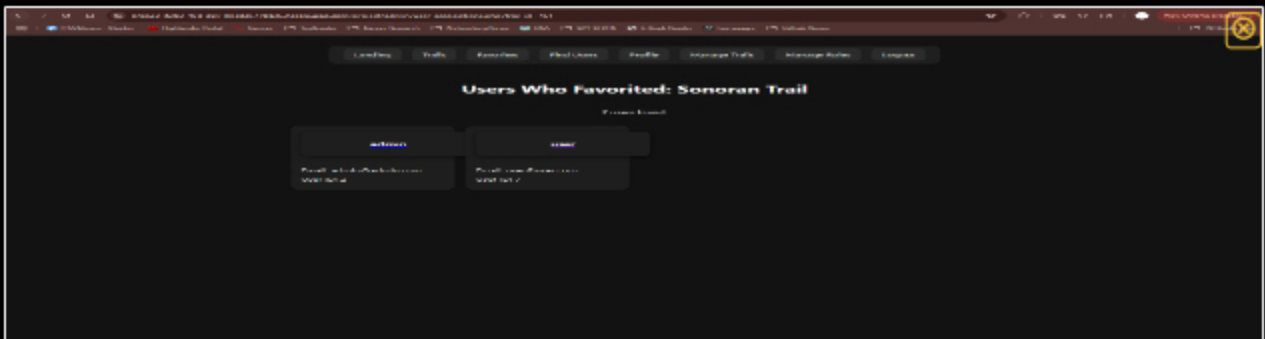

Details:

- Show a few examples of this page from heroku dev with various filters applied
- Ensure heroku dev url is visible
- Ensure each requirement is visible

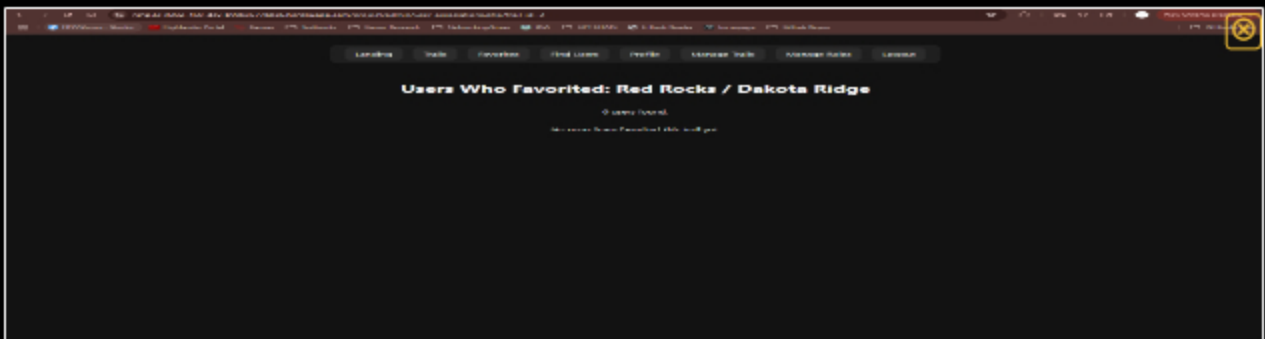

ID	NAME	CITY	STATE	FAVORITE KEY	ACTIONS
101	Sonoran Trail	Phoenix	Arizona	3 users	View Edit Add Remove
102	Arizona Trail	Phoenix	Arizona	1 user	View Edit Add Remove
103	Whitman's Trail	Phoenix	Arizona	1 user	View Edit Add Remove
104	Phoenix Trail	Phoenix	Arizona	1 user	View Edit Add Remove
105	Arizona Trail	Phoenix	Arizona	1 user	View Edit Add Remove
106	Arizona Trail	Phoenix	Arizona	1 user	View Edit Add Remove
107	Arizona Trail	Phoenix	Arizona	1 user	View Edit Add Remove

Added button to existing trails admin page

Click view users

Unfavorited trail

 Saved: 8/5/2025 12:54:38 PM

⇒ Part 2:

Progress: 100%

Details:

- Describe how you solved showing the particular association output
- Describe how you solved the various items required for this page (i.e., line item requirements, stats, filter/sort, etc)

Your Response:

I added to my existing manage trails admin page, the stats of favorited trails, the ability to edit associations to a trail, and a page to view users associated with a trail. TWhen the button is pressed it shows the stats, user profiles, and the ability to press the user profile as well. The all associated is done with the filter button most favorited, and will show all those with favorites.

 Saved: 8/5/2025 12:54:38 PM

☰ Task #3 (1.50 pts.) - Unassociated Page

Progress: 100%

Details:

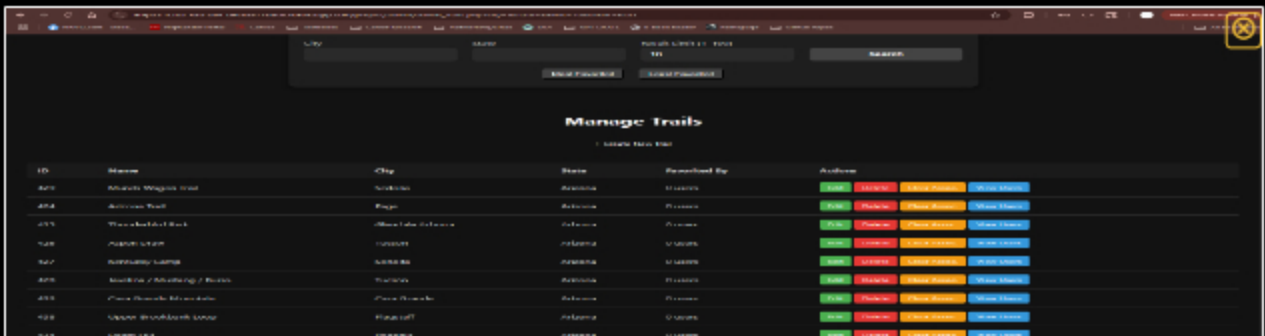

- Each line item should have a logical summary
- Each line item should have a link/button to a single view page of the entity
- The page should have a section for stats (number of results and total number possible based on the query filters)
- The page should have logical options for filtering/sorting
 - A limit should be applied between 1 and 100 and controlled by the user (server-side enforces rules)
 - A filter with no matching records should show "no results available" or equivalent

🖼️ Part 1:

Progress: 100%

Details:

- Show a few examples of this page from heroku dev with various filters applied
- Ensure heroku dev url is visible
- Ensure each requirement is visible

ID	Name	City	State	Reviewed By	Actions

☰ Part 2:

Details:

- Describe how you solved showing the particular association output
- Describe how you solved the various items required for this page (i.e., line item requirements, stats, filter/sort, etc)

Your Response:

The least favorited filter is applied which will show trails who do not have associations. It will filter by all trails with no favorites and then the view users button brings to an empty page since there are no associated users. It is the same get filter form used with everything else for the page.

Saved: 8/5/2025 12:56:58 PM

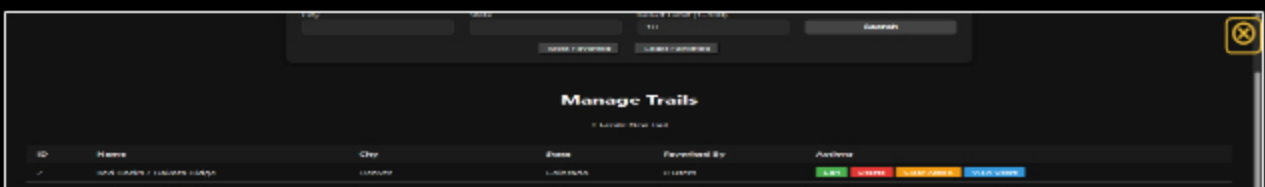

≡ Task #4 (1.50 pts.) - Admin Association Page (Like User Roles)

Details:

- The page should have a form with two fields
 - Partial match for username
 - Partial match for entity reference (name or something user-friendly)
- Submitting the form should give up to 25 matches of each
 - Likely best to show as two separate columns
- Each entity and user will have a checkbox next to them
- Submitting the checked associations should apply the association if it doesn't exist; otherwise it should remove the association
 - A filter with no matching records should show "no results available" or equivalent

Part 1:
Details:

- Show a few examples of this page from heroku dev with various selections having been submitted
- Ensure heroku dev url is visible
- Ensure each requirement is visible

Task #3 (0.33 pts.) - Reflection

Progress: 100%

Task #1 (0.33 pts.) - What did you learn?

Progress: 100%

Details:

Briefly answer the question (at least a few decent sentences)

Your Response:

I learned a lot about data association with users and how it can be difficult and weird to work with. You have to be able to handle all cases of what a user might try to do with the data and predict them with error messages or just hardening the code so that users cannot do specific things. Overall, I think the project went well and I am excited to demo it.

 Saved: 8/5/2025 1:03:02 PM

Task #2 (0.33 pts.) - What was the easiest part of the assignment?

Progress: 100%

Details:

Briefly answer the question (at least a few decent sentences)

Your Response:

the easiest part of this assignment was adding the actual favorite record. All I needed to do was add the table storing all associations, and the query was as

simple as adding the user id and the trail id in the association table together.

Saved: 8/5/2025 1:03:54 PM

⇒ Task #3 (0.33 pts.) - What was the hardest part of the assignment?

Progress: 100%

Details:

Briefly answer the question (at least a few decent sentences)

Your Response:

The hardest part was adding filtering for favorites and user searching. I had to sanitize inputs as well as keeping it functional, and the queries were complex joins that were difficult to create, but I eventually got them working and they now show properly on all pages.
