

Submission Worksheet

Submission Data

Course: IT202-450-M2025

Assignment: Milestone 2 API Testing

Student: Nicholas P. (nmp33)

Status: Submitted | **Worksheet Progress:** 100%

Potential Grade: 10.00/10.00 (100.00%)

Received Grade: 0.00/10.00 (0.00%)

Started: 7/15/2025 9:11:39 PM

Updated: 7/15/2025 9:46:11 PM

Instructions

- Overview Link: <https://youtu.be/86v8Ak0E3XE>
- 1. Ensure you read all instructions and objectives before starting.
- 2. Ensure you added your API choice to the Google doc shared on Canvas (selections must be unique, no two students can use the same exact API)
- 3. Create a new branch from Milestone2 called M7-Homework
 - 1. `git checkout Milestone2` (ensure proper starting branch)
 - 2. If you don't have Milestone2 yet, create it from Milestone1
 - 3. `git pull origin Milestone2` (ensure history is up to date)
 - 4. `git checkout -b M7-Homework` (create and switch to branch)
- 4. Follow the lesson from
 - Add `testApi.php` to your project folder
 - Immediately record to history
 - `git add public_html`
 - `git commit -m "adding M7 HW baseline files"`
 - `git push origin M7-Homework`
 - Create a Pull Request from M7-Homework to Milestone2 and keep it open
- 5. Fill out the below worksheet
 - Ensure you add the UCID/Date and details comments as you work
 - Get the example working with your chosen API
- 6. Once finished, click "Submit and Export"
- 7. Locally add the generated PDF to a folder of your choosing inside your repository folder and move it to Github
 - 1. `git add .`
 - 2. `git commit -m "adding PDF"`
 - 3. `git push origin M7-Homework`
 - 4. On Github merge the pull request from M7-Homework to Milestone2
 - 5. On Github create and merge the pull request from Milestone2 to dev
 - 6. On Github create a pull request from dev to prod and immediately merge. (This will trigger the prod deploy to make the Heroku prod links work)

8. Upload the same PDF to Canvas

9. Sync Local

1. git checkout dev
2. git pull origin dev
3. git checkout Milestone2
4. git pull origin Milestone2

Section #1: (2 pts.) Analyze Api Choice

Progress: 100%

⇒ Task #1 (0.40 pts.) - API Link

Progress: 100%

URL #1

<https://rapidapi.com/trailapi/api/trailapi>

URL

<https://rapidapi.com/trailapi/>

Saved: 7/15/2025 9:11:39 PM

⇒ Task #2 (0.80 pts.) - Quota and Limitations

Progress: 100%

Your Response:

500 Requests per day

Saved: 7/15/2025 9:13:41 PM

⇒ Task #3 (0.80 pts.) - Goal Data

Progress: 100%

Details:

- Clearly note what type of data you'll be using
- Clearly note the specific properties you intend to use (it's likely not all of them)

Your Response:

I will be using the name of the park, city/state location, directions to get there, the url to the trail, the description, and the associated activities. I will allow users to request by city, state, and activity.

Saved: 7/15/2025 9:16:14 PM

Section #2: (6 pts.) Verify Api Choice

Progress: 100%

- The code will need to be adjusted since your API differs from the one I chose
- You'll need to apply the API .env items to Heroku's config vars both dev and prod
- Be mindful of your API quota (may need to initially use a cached response until you get it working)

1. Snippet of relevant code showing solution (with ucid/date comment) 2. Don't show any private details like the API key
2. Full output of executing the `testApi.php` (visit the proper file on Heroku dev after a manual deploy)

Dev example

 Saved: 7/15/2025 9:41:56 PM

Part 2:

Progress: 100%

Details:

- Direct link to the file in the homework related branch from Github (should end in .php)
- Direct link to the file on Heroku Prod (Just grab the base prod url and manually enter the path to the file)

Part 3:

Progress: 100%

Details:

Briefly explain what you needed to do in order to get this test working

Your Response:

I added an activities array to list in a parameter section to query the api. I also changed the form to fit the necessary fields to fit the API and also added the api key to .env.

Section #3: (2 pts.) Misc

Progress: 100%

Task #1 (0.67 pts.) - Github Details

Part 1:

Progress: 100%

Details:

From the Commits tab of the Pull Request screenshot the commit history Following minimum should be present

Commits

Saved: 7/15/2025 9:42:44 PM

Part 2:

Progress: 100%

Details:

Include the link to the Pull Request (should end in /pull/#)

Task #2 (0.67 pts.) - WakaTime - Activity

Progress: 100%

Details:

- Visit the WakaTime.com Dashboard
- Click Projects and find your repository
- Capture the overall time at the top that includes the repository name
- Capture the individual time at the bottom that includes the file time
- Note: The duration isn't relevant for the grade and the visual graphs aren't necessary

Task #3 (0.67 pts.) - Reflection

Progress: 100%

Task #1 (0.33 pts.) - What did you learn?

Progress: 100%

Details:

Briefly answer the question (at least a few decent sentences)

Your Response:

I learned that it is important to keep api keys secret as it can lead to abuse from an outside user. I also learned how to format a request to an api and how to handle the response data.

Saved: 7/15/2025 9:44:46 PM

Task #2 (0.33 pts.) - What was the easiest part of the assignment?

Progress: 100%

Details:

Briefly answer the question (at least a few decent sentences)

Your Response:

The easiest part was changing the HTML form to fit my parameters. I added a city and state input as well as an activities drop down.

Saved: 7/15/2025 9:45:26 PM

⇒ Task #3 (0.33 pts.) - What was the hardest part of the assignment?

Progress: 100%

Details:

Briefly answer the question (at least a few decent sentences)

Your Response:

The hardest part was making sure the whole request was being sent properly and limiting the use of the API. I need to still connect it to the DB to cache responses so that the API is not being overused though.
